Program Effectiveness Data

The following is the most current program effectiveness data. Our programmatic accreditation agency, the Joint Review Committee on Education in Radiologic Technology (JRCERT), defines and publishes this information. [Click here](#) to go directly to the JRCERT webpage.

Credentialing Examination: The number of students who pass, on the first attempt, the American Registry of Radiologic Technologists (ARRT) certification examination, or an unrestricted state licensing examination, compared with the number of graduates who take the examination within six months of graduation. The five-year average benchmark established by the JRCERT is 75%.

Credentialing Examination Rate	number passed on 1 st attempt divided by number attempted within 6 months of graduation
Year	Results
Year 1 -	of -
Year 2 -	of -
Year 3 -	of -
Year 4 -	of -
Year 5 -	of -
Program 5-Year Average	of -

Job Placement: The number of graduates employed in the radiologic sciences compared to the number of graduates actively seeking employment in the radiologic sciences within twelve months of graduating. The five-year average benchmark established by the JRCERT is 75%.

Job Placement Rate	number employed divided by number actively seeking employment within 12 months of graduation
Year	Results
Year 1 -	of -
Year 2 -	of -
Year 3 -	of -
Year 4 -	of -
Year 5 -	of -
Program 5-Year Average	of -

Program Completion: The number of students who complete the program within the stated program length. The annual benchmark established by the program is .

Program Completion Rate	number graduated divided by number started the program
Year	Results
Year -	of
Annual Completion Rate	

The JRCERT has developed the following definitions and criteria related to program effectiveness outcomes:

Credentialing examination pass rate:

The number of graduates who pass, on first attempt, the American Registry of Radiologic Technologists (ARRT) certification examination or an unrestricted state licensing examination, compared with the number of graduates who take the examination within six months of graduation.

Job placement rate:

The number of graduates employed in radiologic sciences compared to the number of graduates actively seeking employment in the radiologic sciences. The JRCERT has defined not actively seeking employment as:

1. Graduate fails to communicate with program officials regarding employment status after multiple attempts.
2. Graduate is unwilling to seek employment that requires relocation.
3. Graduate is unwilling to accept employment, for example, due to salary or hours.
4. Graduate is on active military duty.
5. Graduate is continuing education.

Program completion rate:

The number of students who complete the program within the stated program length. The program specifies the entry point (e.g., required orientation date, final drop/add date, final date to drop with 100% tuition refund, official class roster date, etc.) used in calculating the program's completion rate. When calculating the total number of students enrolled in the program (denominator), programs need not consider students who attrite due to nonacademic reasons such as:

1. Financial, medical/mental health, or family reasons.
2. Military deployment.
3. A change in major/course of study.
4. Other reasons an institution may classify as a nonacademic withdrawal.
